EXPERIENCE AND PROJECTS

[Travel Booking Site](#)

Allow customers to pick travel destinations from various options such as price or number of members and then calculate the total price and book the tour. The project uses React including React router, React Hooks and Context API.

[Vietnam Weather](#)

Help users to check weather from anywhere in the world by pulling data from Open Weather API and also allow them to check time, set goals and set up an unique greeting. The project uses CSS, local storage and JS fetch API.

[English Learning App](#)

Allows users to save new words, listen to pronunciation by pulling data from Web-Speech API, and take note at the same time. Learners can also test themselves by doing quiz. The projects use JavaScript, CSS and Speech API.

[New Tictactoe Game](#)

Update the traditional tictactoe game to a whole new level. There are four modes in the game: easy, crazy, insane, 2 players. Each level will bring unique experience and excitement. The project uses Javascript and CSS.

Other projects are available at [my Portfolio](#).
